## Update of the DID-list

Dear interested party

On behalf of the EU commission Ecolabelling Denmark has in cooperation with Ecolabelling Norway started updates and corrections to the DID-list.

The DID-list is today used in the EU criteria for chemical and technical products and will in future be implemented in the Swan criteria for chemical and technical products. Therefore it is of great importance and interest for everyone that the list will be as up-to-date and correct as possible.

If you have input to the DID-list, Ecolabelling Denmark ask you kindly to send in information which contributes to updating of the list. For corrections of existing data documentation must be enclosed for the correction. If new substances are added to the list they are to be enclosed with documentation, which makes it possible to insert all relevant information on the DID-list.

At the latest Ecolabelling Denmark must have the information in possession 16 December 2005. The information is to be send to Ecolabelling Denmark, if possible by e-mail to Mogens Stibolt: [mst@ecolabel.dk](mailto:mst@ecolabel.dk). In alternative the information can be send directly to Ecolabelling Norway to Marianne Eskeland: [Marianne.b.eskeland@ecolabel.no](mailto:Marianne.b.eskeland@ecolabel.no).

Enclosed you will find a letter from Ecolabelling Norway concerning the update of the DID-list with more thoroughly remarks.

The hearing is also accessible from our homepage [www.ecolabel.dk](http://www.ecolabel.dk)

Best regards  
Ecolabelling Denmark
